

HIGHER EDUCATION

The learning platform that puts students at the center

its learning
a Sanoma company

How does a learning platform empower educators and students?

A learning platform (LMS) provides educational organizations with a streamlined, user-friendly online environment for educators, students and IT administrators.

It's a place to identify learning gaps, create lessons, organize and deliver content and courses, and assess student performance data while tracking and monitoring student progress in real-time.

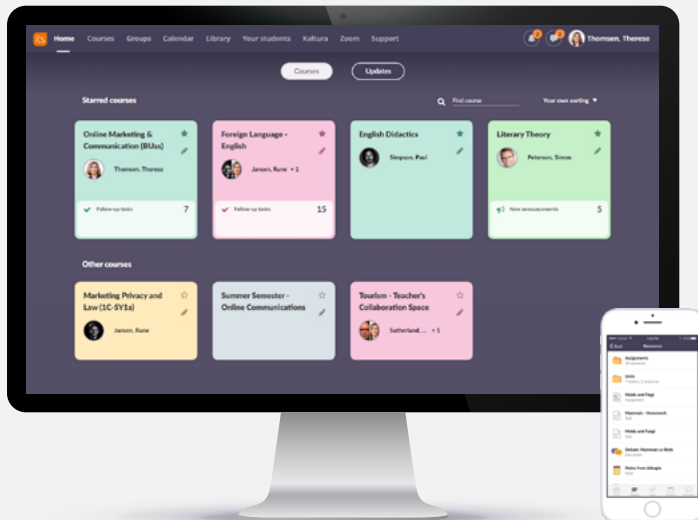

Figure: the itslearning wheel

Our learning platform helps higher education institutions deliver their learning experience in a flexible and personalized way. It's optimized for student-centered teaching and meets students' expectations for their studies.

Learn more about the pedagogical tools we deliver to support the [six steps of the learning process](#): Plan, Engage, Teach, Assess, Reflect & Report.

Organization

Reusable and shared planner for multiple courses

"Teachers give structure to their courses using Plans and course templates available in itslearning. This makes it easier for students to view content and understand the goals of their courses."

Paula Santapakka, Lecturer, Learning Services, Centria University of Applied Sciences, Finland

CALENDAR

Aggregated view of all relevant course calendars. Personal calendar. Enables resource booking. Displays all relevant Course Plans.

PLANS

Allows lecturers to collaborate in the creation of detailed plans for a specific area of teaching and learning. Connect learning objectives and link directly to relevant resources from the plans.

LEARNING PATHS

Set up learning paths to enable students on different levels to reach the same goal at their own pace. Add resources and tasks to a learning path for a student to follow.

Collaboration

Support the co-creation of knowledge between lecturers and students

"Group and project work became even more important to us when we went fully online during the pandemic. We've had good experience doing this with itslearning."

Sara Kvist, Specialist Consultant
University of Southern Denmark (SDU), Denmark

VIDEO CONFERENCING

Connect in various ways including Microsoft Teams, Zoom, and other high-end apps.

MICROSOFT & THIRD-PARTY APPS

Set collaborative tasks, co-author and make annotations in Microsoft Office docs from within itslearning.

PROJECTS

A collaborative space where students and/or lecturers can work together on shared projects.

GROUP ASSIGNMENTS

Set collaborative assignments in Microsoft or Google docs from within itslearning.

LIBRARY

Lecturers can collaborate on and share resources internally or across the global itslearning community.

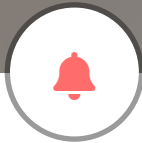

Communication

Use communication tools to connect students and educators

MESSAGING

itslearning offers multiple ways of sending messages so communication can take place efficiently and in real-time.

NOTIFICATIONS

Automated notifications alert the user to key events, new tasks, assessments, and more.

ANNOUNCEMENTS

News and announcements, scheduled or real-time, can be quickly broadcast to groups of users.

"itslearning provides students and teachers with the opportunity to see, hear, and experience the same things – whether they are present or joining remotely."

Gökay Hamdi Şenel, Educational Technologist,
Bahçeşehir University Global Online (BAUGO)

Assessment

Create tasks, formative and summative assessments, and quizzes through a central platform

TASK

Set, monitor and assess offline tasks and practical activities.

TEST/QUIZ

Self-grading tests and quizzes with a wide variety of question formats. Supports the use of media and embedded content in both questions and responses.

ONLINE ANNOTATION

Students' submitted work can be viewed and annotated online without the need to download.

ASSIGNMENT

Set tasks that can be completed and assessed online. Embed or record audio and video, attach multiple files, and use other resources to make assignments engaging.

Mobile Learning

Cloud based platform accessible anywhere, anytime and on any device

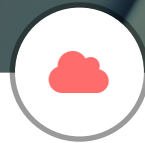

MOBILE APP

Everything you need, accessed seamlessly with your phone. Works on all major mobile platforms.

WEB-BASED SOFTWARE

Completely device agnostic. Works on all devices, operating systems and all modern browsers.

CLOUD BASED

99.99% availability, hosted in a safe and secure environment with full technical support.

Resources & Activities

Multimedia tools for an immersive, interactive learning experience.

"The itslearning implementation process at KP has been praised as 'thorough and well-executed'. We think our success is partly due to a focus on teacher ownership: adapting the learning platform to their specific goals and needs."

Nis Kappel Sørensen,
Implementation Consultant, University College Copenhagen
(KP), Denmark

OFFICE ONLINE INTEGRATION

Upload and collaborate in Word, PowerPoint, and Excel files, which are automatically embedded for instant access and editing from any device.

INTERACTIVE RESOURCES

Teachers can add a wide range of activities including discussion forums, surveys, assignments, self-grading tests and quizzes to their courses.

ASSESSMENT RECORD

An online gradebook automatically records all assessments. Exports to Excel for import to other systems/further analysis.

LEARNING OBJECTIVES

Assign learning objectives to resources, activities, plans and assessments in-line with the curriculum. Monitor student achievement and ensure adequate curriculum coverage.

RUBRICS

Create rubrics for learning objectives to support criteria-based assessment.

MULTIMEDIA

Video and audio files can be uploaded and played within itslearning. Use content from external sources or record directly within the platform to provide feedback, instructions or support.

Reflection & Development

Delivering personalized learning to meet individual needs

LEARNING JOURNAL

Each student and teacher has their own journal for reflection and demonstrating achievements over time.

ePORTFOLIO

Portfolios can be created by teachers and students to share work, including publicly online if desired.

INDIVIDUAL LEARNING PLANS

Mentors can work with students or teachers to set and monitor personal, learning or professional development goals.

"Reflection promotes deeper learning, so we educators are constantly looking for better ways to enable students to reflect. We've used the ePortfolio and peer assessment in itslearning to apply the pedagogical approach Reflective Practice-based Learning, with great success."

Helle Tougaard, Associate Professor,
Department of Communication Studies, Danish
School of Media and Journalism (DMJX)

Reporting, Data & Analytics

Using data to the fullest potential, allowing for better-informed decision making

360° REPORTS

Quickly compare the progress of all your students in the course. Students can also see their own Activities, Progress and Grades by using the 360° reports for students.

STANDARD REPORTS

Reports on storage, logins and course visits for administrators. 360° reports in courses for teachers and students, and tool-specific reports.

ADVANCED REPORTS

Our built-in learning analytics enable you to access details on user engagement, curriculum management, student progress etc.

CUSTOM ADVANCED REPORTS

Customized reports aligned to the exact needs of each university. Anything is possible.

Integrations

A central hub with the best tools in education according to global standards

IMS GLOBAL

Current Registrations:
[imscert.org](https://www.imscert.org)

itslearning is LTI Advantage Complete certified.

This means that we can offer our users third-party tools and content, while protecting user data and providing a secure pathway to plug-and-play interoperability. This provides lecturers and students with endless possibilities to get more content and functions that make the whole educational path easier.

SOME OF THE INTEGRATIONS AVAILABLE:

Additional Services

Supporting the digital strategy at your university

IMPLEMENTATION

We work in close collaboration with you to ensure that the learning platform is deployed to suit your requirements.

INTEGRATION

Connect itslearning to your preferred Student Information System and other critical applications.

CONTENT INTEGRATION

We help sync up all your educational resources into the itslearning content library – so everything remains at your fingertips.

PROFESSIONAL DEVELOPMENT

We provide ongoing instructional and technical training as well as pedagogical consultancy to help you build internal competencies and capacity.

About itslearning

From a local startup in Bergen, Norway, we have grown to a large international company, but our mission has never changed – to improve education through technology.

We believe that while technology will never replace great teachers, technology can help great teachers change lives. That's why our cloud-based learning platform is designed for teachers and how they want to teach.

We get real teachers in real classroom situations to validate our platform and we partner with the biggest and most popular technology and content providers. Today, we help millions of people around the world at all levels of education improve learning outcomes.

Our goal is to empower students by empowering teachers. That's why we are **at the heart of education**.
